# SSTManagement System Document
## Name: Nguyen Tan Thanh
## S3634815

The following software using pure Java implementation with MVC pattern and OOP structure.
The system was built with JavaFx and Screen Builder for better UI design.
The system also uses Java Serialization to make sure data consistency.

The project was big therefore the main resources came from StackOverFlow and Self studying.
The entire project took 2 weeks of planning, design, and implement. (16/11 to 2/12/2019)
